

Add Supporter Logos

Use the same method for Resources Logo's on the resources page

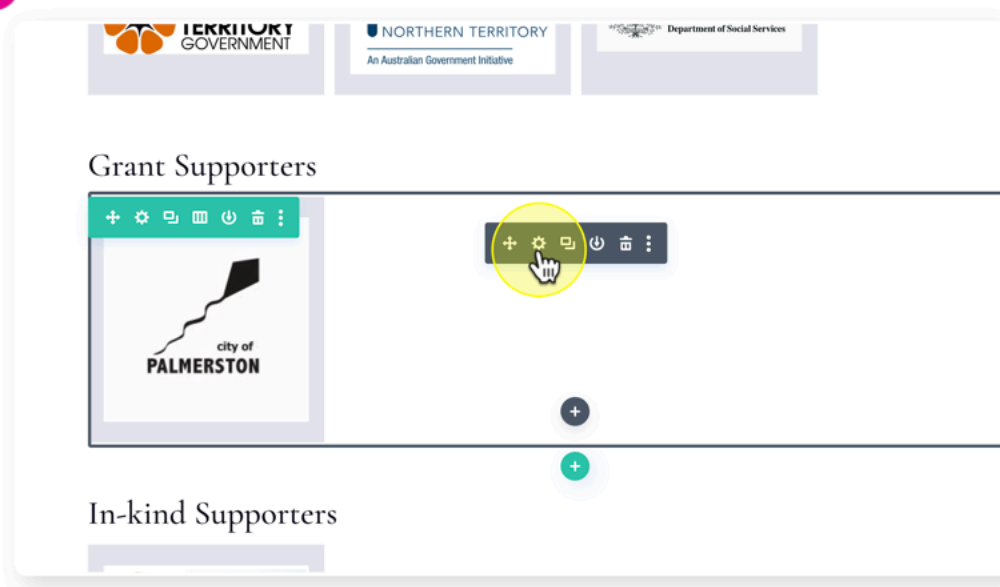

- 1 Supporter Logos are added to the section on the About Us page using the Logo Grid module.
The grid has been set up to have 4 logos across and then automatically create a new row.
Open the module and you will be able to add more logos to the grid.
Clone an existing logo and replace the image and link, to ensure the you are using the same layout settings

Prepare the logo so that it fits on a 200px x 200px square - Because logos are lots of different aspect ratios, create a white square in Canva and drop the logo on to it - this way it will always fit the 200x200 space and stay consistent.

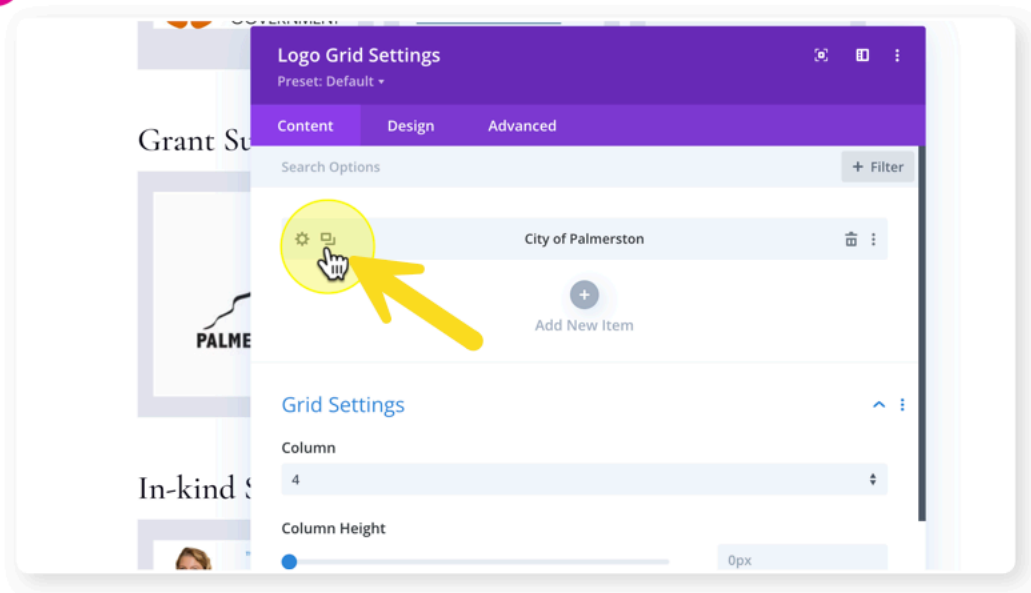

- 2 Click on "Enable Visual Builder"

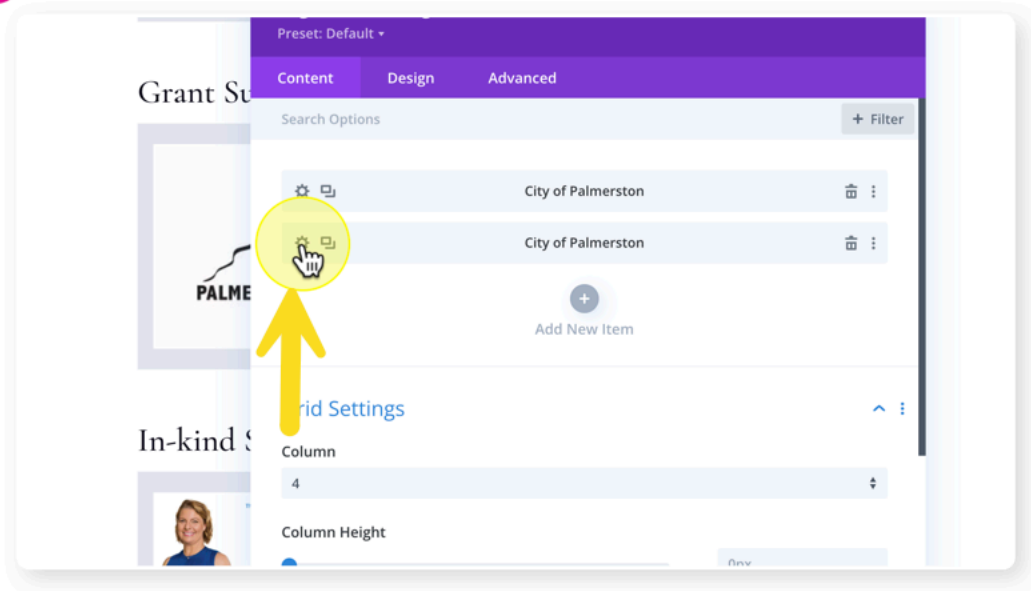

- 3 Scroll down to the section and click on the (grey) module edit cog

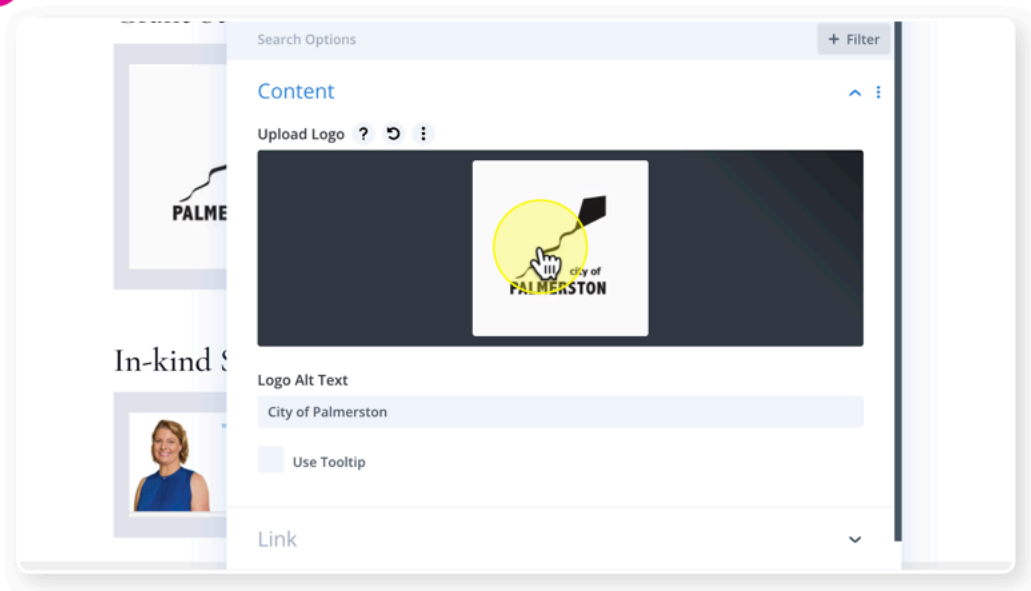

4 So that the new icon matches the style of previous, click the duplicate icon.

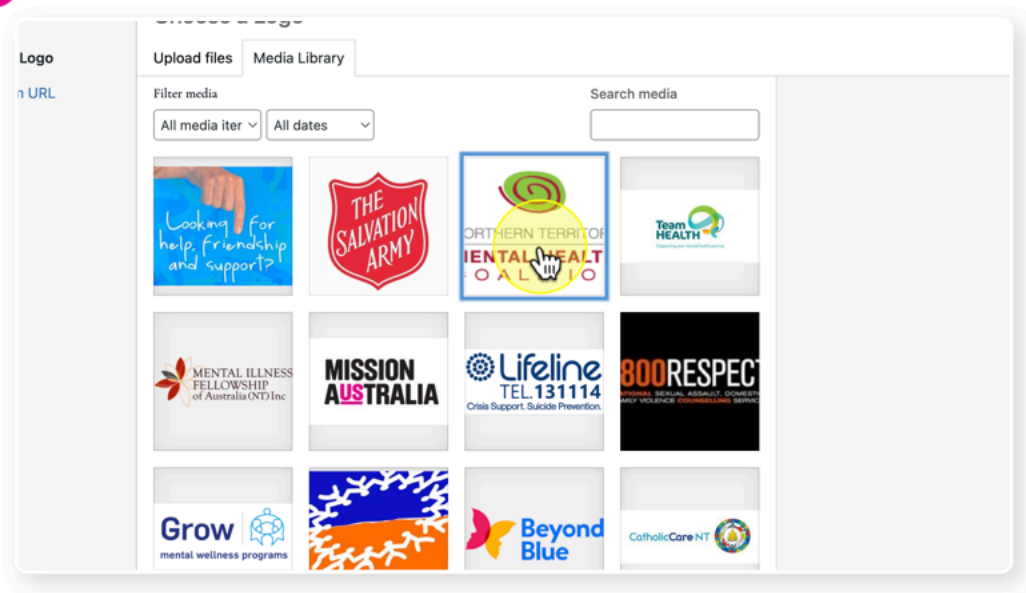

5 Now click the edit cog of the duplicate.

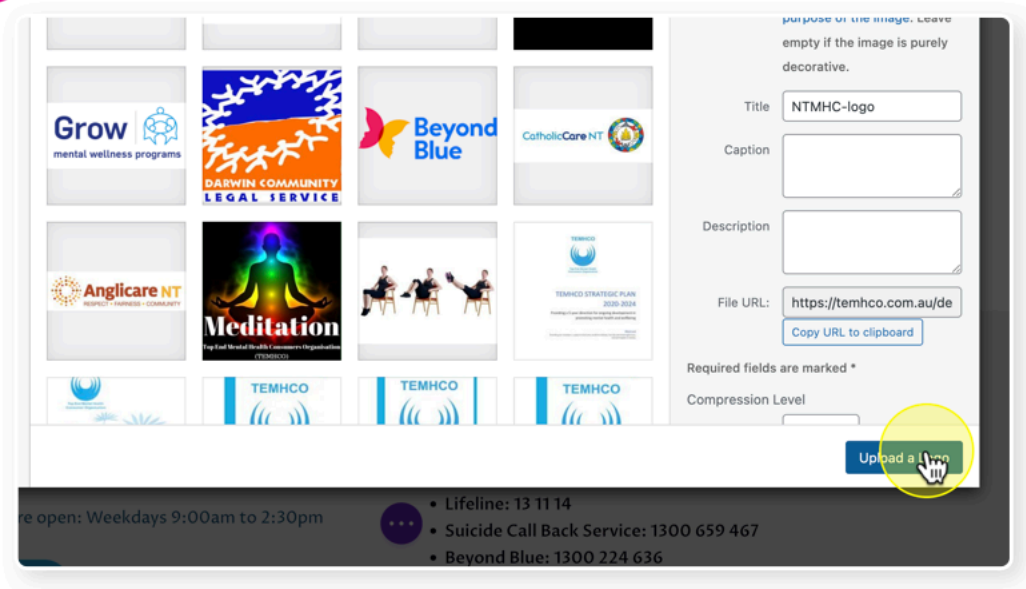

6 Click the image to be taken to the media library and replace it with a new logo

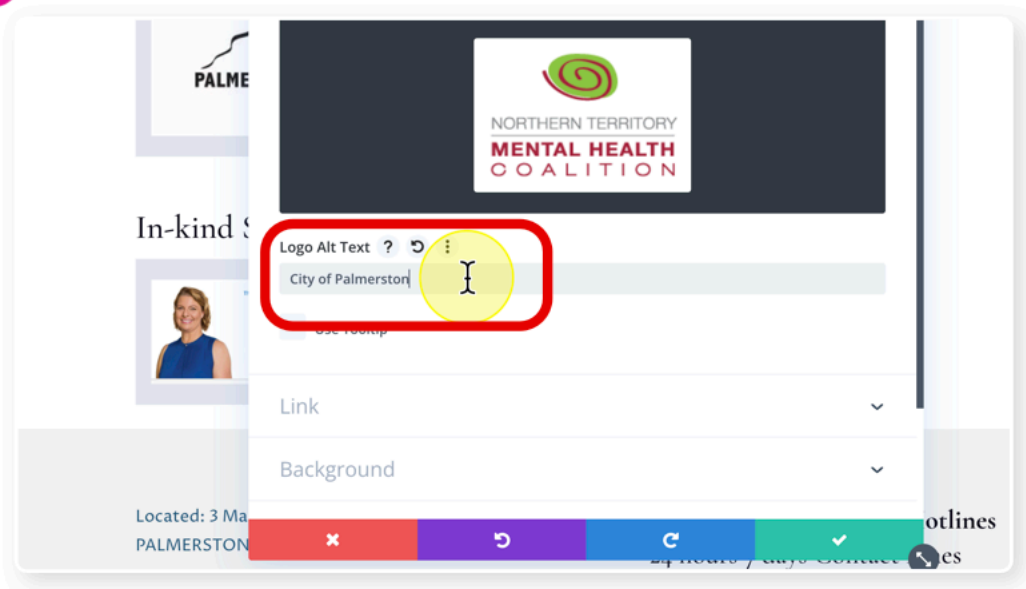

7 The logo should fit in a 200px x 200px square.

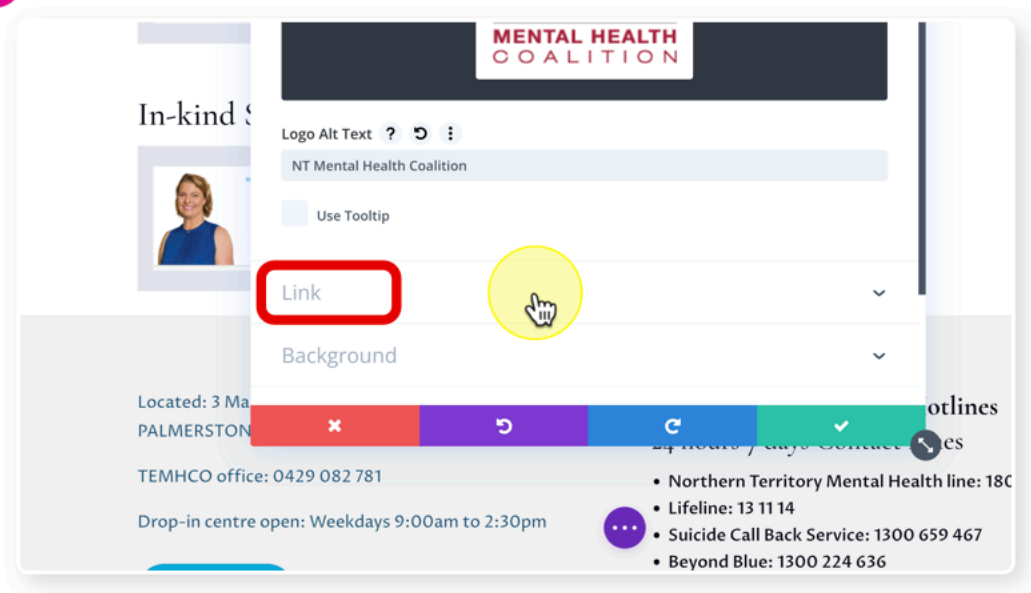

8 Click on "Upload a Logo"

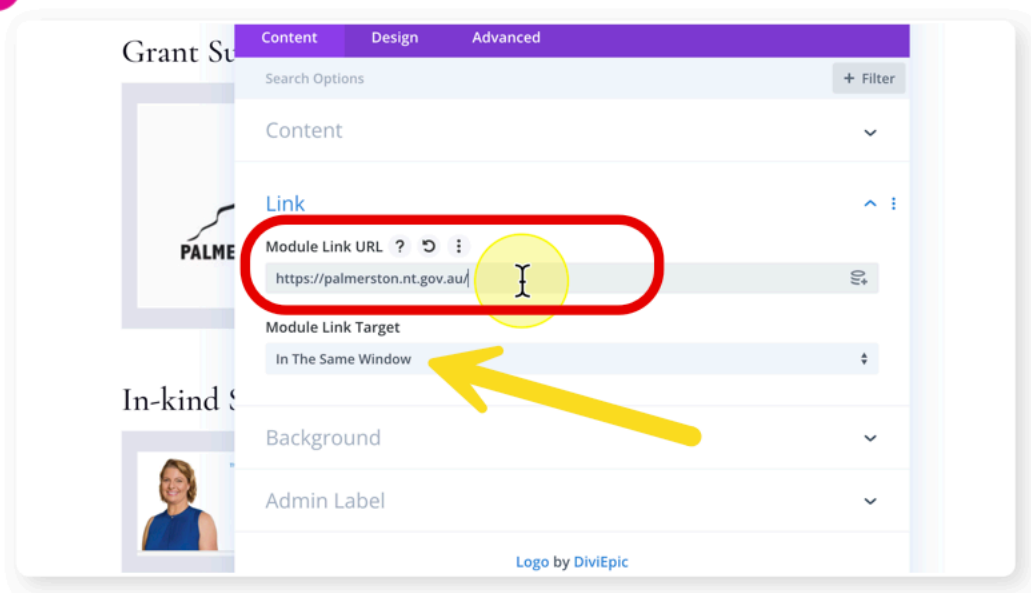

9 Now enter the business name

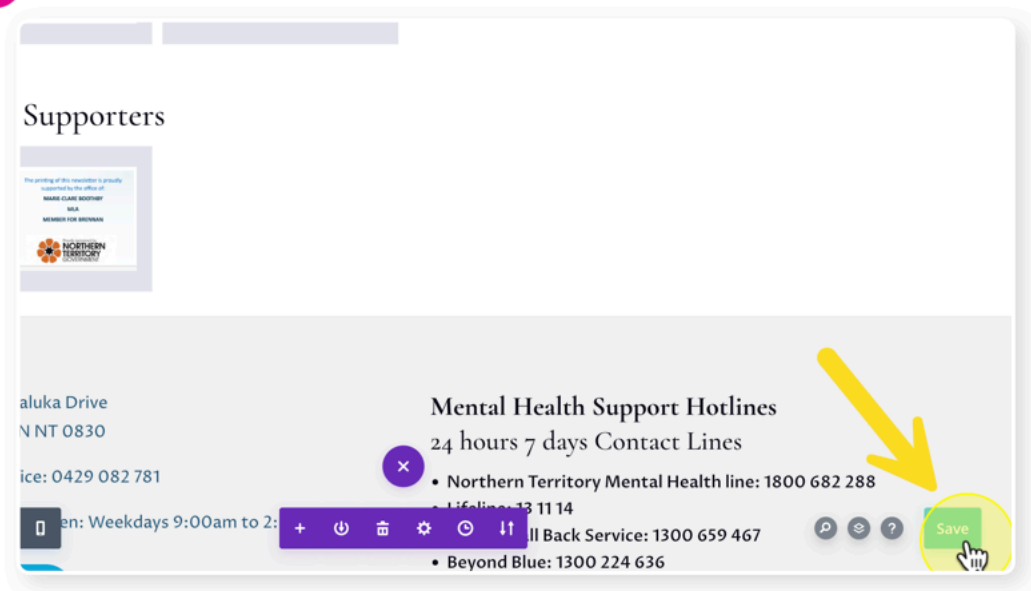

10 Click 'Link'

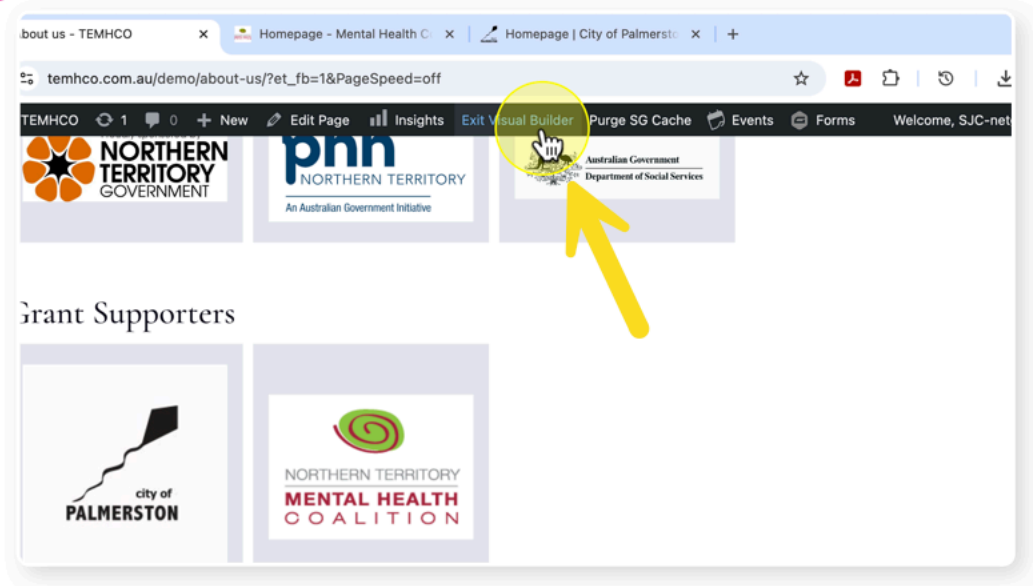

11 Enter the web site address / change Module Link Target to 'New Tab'

12 Click on "Save"

13 Exit Visual Builder

14 Test that the link works correctly
